

SCHOOL OF BIOPHOTONICS

2014 KOŠICE , SLOVAKIA 26 MAY – 1 JUNE 2014

MOTIVATION AND OBJECTIVES

The course aim is addressing the task of improving theoretical as well as practical knowledge of doctoral students in advanced methods of biophotonics.

ORGANIZED BY:

DOCTORAL SCHOOL

Biophysics (P. J. Safarik University, Kosice, Slovakia)

TOPICS:

THEORETICAL COURSES (18 HOURS)

- Introduction (repetitorium in optics and spectroscopy)
- Principles of optical experiments
- Fluorescence microscopy techniques
- Advanced laser techniques
- Raman spectroscopy and imaging
- Lasers in medicine
- Bioenergetics
- Cultural applications

PRACTICAL TRAINING (15 HOURS)

LECTURERS/TEACHERS:

G. Bánó, V. Huntošová, M. Fabian, G. Fabríciová, D. Jancura,
Z. Jurašeková, S. G. Kruglik, A. Marček Chorvátová, P. Miškovský,
Z. Nadová, S. Sánchez Cortés, H. van den Bergh
